# Getting Started

---

3 Simple Steps to manage your IT Assets with justSAMit:

**1. Setup and Activate your account ([www.justsamit.com](http://www.justsamit.com))**

Create an account with us and a confirmation email will be sent to you. Click on the activation link to verify that your email address is valid.

**2. Deploy agent to your computers**

Multiple operating system platforms such as Windows, MacOS, Linux and Unix (coming soon) are supported. You can download the agent from justSAMit Administration website or your users can even install it themselves from the self-service link.

**3. Start your inventory!**

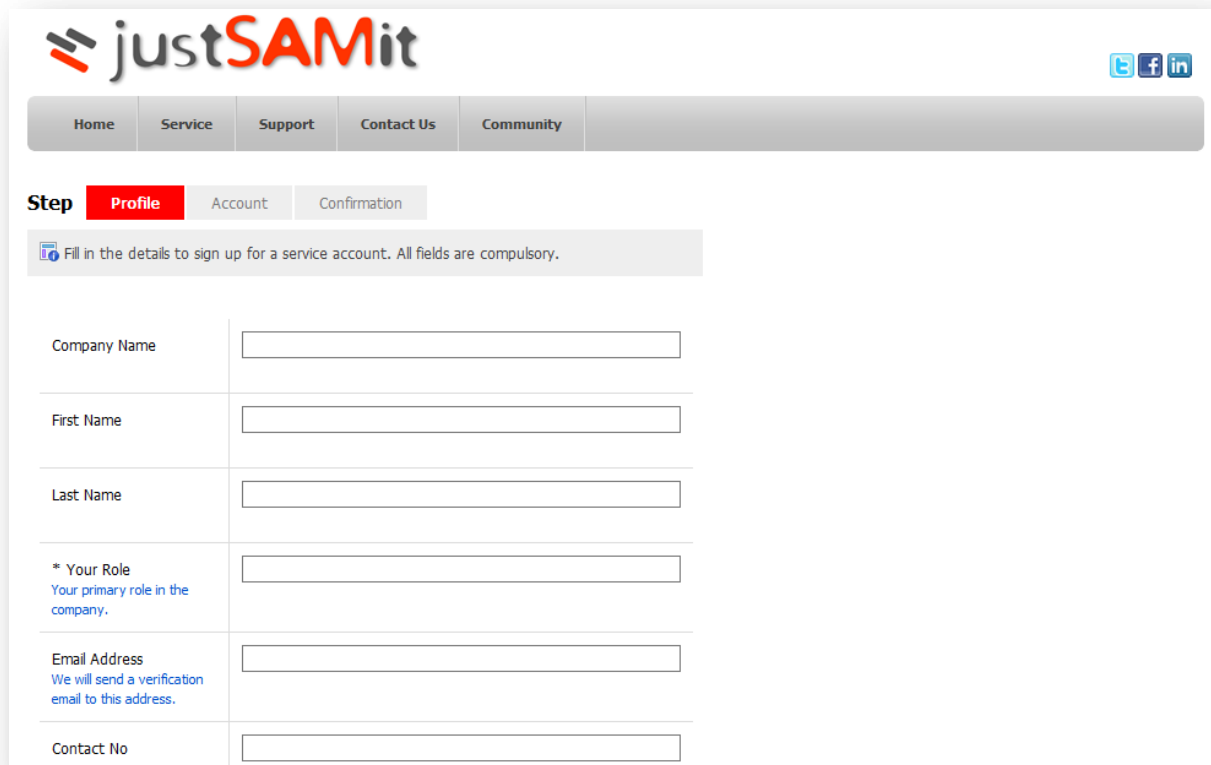

Just login to your website at [www.justsamit.com](http://www.justsamit.com) and begin managing your assets.

# Setup and Activate your Account

## Sign Up

Visit [www.justsamit.com](http://www.justsamit.com) and sign up for an account. Just fill up your particulars and submit the details.

The screenshot shows the justSAMit website's sign-up interface. At the top, there is the justSAMit logo and social media icons for Twitter, Facebook, and LinkedIn. Below the logo is a navigation menu with links for Home, Service, Support, Contact Us, and Community. The main content area is titled 'Step' and has three tabs: 'Profile' (which is highlighted in red), 'Account', and 'Confirmation'. Below the tabs, there is a grey box with a blue icon and the text: 'Fill in the details to sign up for a service account. All fields are compulsory.' The form consists of several input fields arranged in a table-like structure:

Company Name	<input type="text"/>
First Name	<input type="text"/>
Last Name	<input type="text"/>
* Your Role <small>Your primary role in the company.</small>	<input type="text"/>
Email Address <small>We will send a verification email to this address.</small>	<input type="text"/>
Contact No	<input type="text"/>

## Activate your new account

You will receive a Service Validation email for account activation. Here is a sample of the Validation email:

## Welcome Christopher Lee!

We have received your request to register justSAMit service account for **RF Consultant** on Sunday, 10 October, 2010.

Here is your account information:

**Company Name:** RF Consultant  
**Email:** chris@rfconsultant.com  
**Registered By:** Christopher Lee

Activation  
Link

Please click the link below to activate:

<http://www.iustsamit.com/ValidateAccount.aspx?oid=Nzq1OWJlMmThmMWItMzJiYTlhN2NIYWZh>

### Let's get started..

#### Step 1: Setup and Activate your account

You have successfully created an account with us. Please click [here](#) to activate it.

#### Step 2: Deploy to your computers

Multiple operating system platforms such as Windows, MacOS, Linux and Unix are supported. You can download the agent from justSAMit

#### Step 3: Start Your Inventory!

# Deploy Agent to your Computers

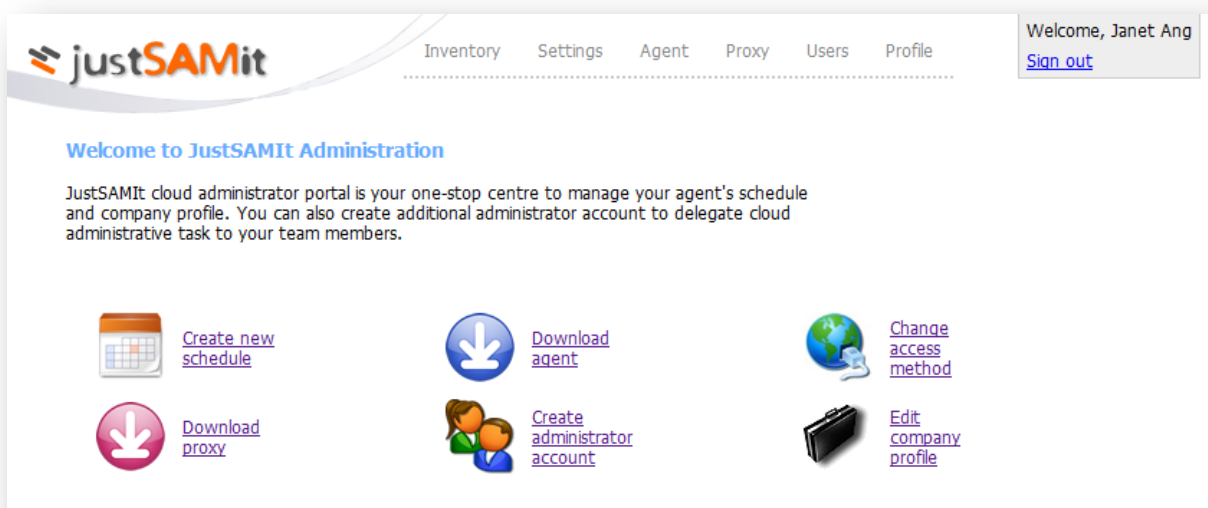

## Login to justSAMit

Once you have activated your account, a Thank You page will be prompted and you can click on the justSAMit website link to login or simply go to [www.justsamit.com](http://www.justsamit.com)

The image shows a 'Sign In' form with a light blue header. It includes a user icon, a prompt to sign up for free, input fields for 'Email' and 'Password', a 'Log In' button, and a link for 'Forgot your password?'.

You will be redirected to justSAMit Cloud Administration portal to let you manage your agent's schedule and company profile. Please refer to Cloud Administration document for further details.

The image shows the JustSAMit Cloud Administration portal. It features a navigation menu with 'Inventory', 'Settings', 'Agent', 'Proxy', 'Users', and 'Profile'. A welcome message for 'Janet Ang' is displayed in the top right corner. The main content area includes a 'Welcome to JustSAMIT Administration' section and a grid of six action buttons: 'Create new schedule', 'Download agent', 'Change access method', 'Download proxy', 'Create administrator account', and 'Edit company profile'.

## Download Agent

To manage your desktops, laptops or servers, just download and install (with Local Administrator rights) the correct agent based on the computer's Operating System. JustSAMit uses a small footprint agent that does not require user's configuration and intervention. It will periodically collect and reports the computers' inventory to our servers based on the settings configured by the company Administrator. You have the control on the schedule inventory, unlike most of the other cloud services that do not allow any changes to the settings.

By default, the agent contains the following settings:

Access Method	Directly to cloud
Scan Machine	Every 60 minutes
Submit Inventory Data	Every 65 minutes
Submit life pulse	Every 20 minutes

To download the agent, please navigate to the "Agent" Tab and download the agent according to the type of Operating System. After the agent is installed on your computers, please allow several minutes for the new inventory to appear in your web dashboard. One windows service and three schedule tasks will be created in the Services and Task Scheduler respectively (please look for JustSAMit). Please login to your account at [www.justsamit.com](http://www.justsamit.com) to view your web dashboard and inventory.

The screenshot shows the JustSAMit web interface. At the top, there is a navigation menu with 'Inventory', 'Settings', 'Agent', 'Proxy', 'Users', and 'Profile'. A user greeting 'Welcome, Janet Ang' and a 'Sign out' link are visible in the top right. The main content area is titled 'Self Service Download' and contains a checkbox labeled 'Enable self service download'. A red box and arrow highlight this checkbox with the text 'Enable Self Service download'. Below this is the 'Download agent' section, which includes a table of default settings and download links for Windows, Mac, and Linux.

Access Method	Scan machine	Submit inventory data	Submit life pulse
Directly to cloud	Every 60 minutes	Every 65 minutes	Every 20 minutes

Not the settings you want to use? Change [Settings](#).

You must install the agent on a desktop that can access the Internet.

For Windows:

For Mac:

For Unix/Linux: Coming soon

## Agent Deployment method

After the agent is downloaded, you can deploy the agent across your organisation with the following methods:

1. Direct Installation  
Login to the computer using the local Administrator or Domain Admin to install locally. Please refer to the Download Agent section above.
2. Domain Logon Script  
You can copy the setup file to a shared network folder (e.g. [\\NETLOGON](#)) and configure the user profile to run the agent.
3. Active Directory GPO  
You can copy the setup file to a shared network folder (e.g. [\\NETLOGON](#)) and configure the group policy on your Active Directory Domain or OU.
4. Using Software Distribution tools  
You can use an existing software distribution tools (e.g. Microsoft SMS) to quickly deploy the agent across your organisation.

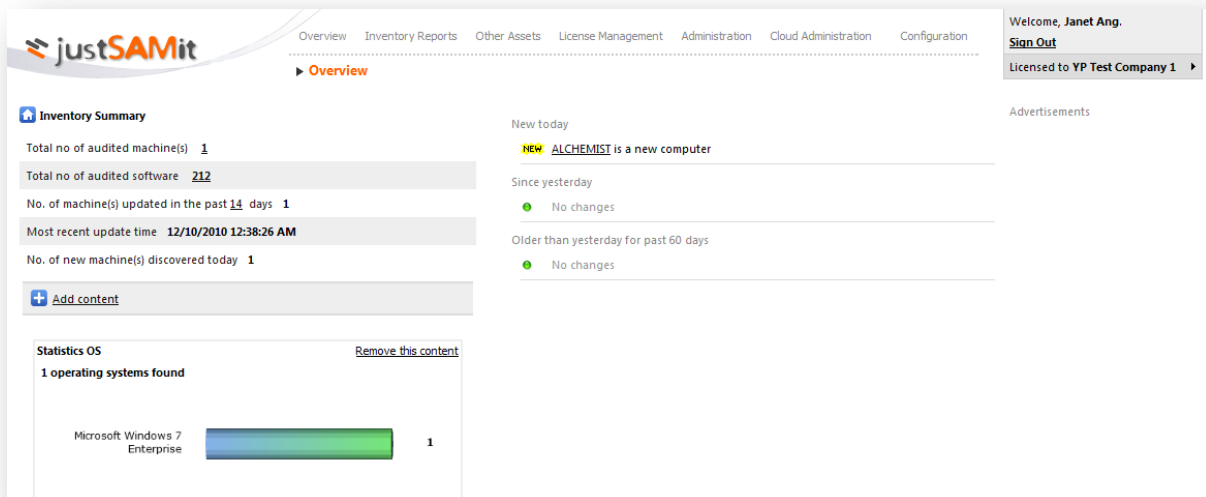

## Self Service Inventory

If you do not want to install the agent to your users' computer, simply send them a link by enabling the self service download and they will be able to install it themselves. Local Administrator rights is required to install the agent. An email will be sent to you with the Self-Service download link. Please refer to the Cloud Administration document for further details.

# Start your Inventory

## Login to justSAMit

Login using your email address at [www.justsamit.com](http://www.justsamit.com). You will be able to view your collected inventory and manage your IT assets now!

The screenshot displays the justSAMit web application interface. The top navigation bar includes links for Overview, Inventory Reports, Other Assets, License Management, Administration, Cloud Administration, and Configuration. The user is logged in as Janet Ang, with a 'Sign Out' button and a license notice for 'YP Test Company 1'. The main content area is titled 'Inventory Summary' and shows the following data:

- Total no of audited machine(s): 1
- Total no of audited software: 212
- No. of machine(s) updated in the past 14 days: 1
- Most recent update time: 12/10/2010 12:38:26 AM
- No. of new machine(s) discovered today: 1

There is an 'Add content' button and a 'Remove this content' link. Below this, a 'Statistics OS' section shows '1 operating systems found' with a bar chart for 'Microsoft Windows 7 Enterprise' (count: 1). On the right, a 'New today' section highlights a new computer named 'ALCHEMIST'. Below that, 'Since yesterday' and 'Older than yesterday for past 60 days' both show 'No changes'.

## And Much More...

JustSAMit offers you detailed and up-to-date hardware inventory information and functionalities as well as customisable reports to help you track and manage your PCs and servers throughout their hardware lifecycle. We let you be on top of your asset inventory, not just hardware and software, but other assets as well. Start using justSAMit functionalities such as Licence Management, Query Wizards, Patch monitoring and reporting.
