Getting Started

3 Simple Steps to manage your IT Assets with justSAMit:

1. Setup and Activate your account (www.justsamit.com)

Create an account with justSAMit and a confirmation email will be sent to you. Click on the activation link to verify that your email address is valid.

2. Deploy agent to your computers

Multiple operating system platforms such as Windows, MacOS, Linux and Unix (coming soon) are supported. You can download the agent from justSAMit Administration website and deploy the agent via Active Directory GPO or other means.

3. Start your inventory!

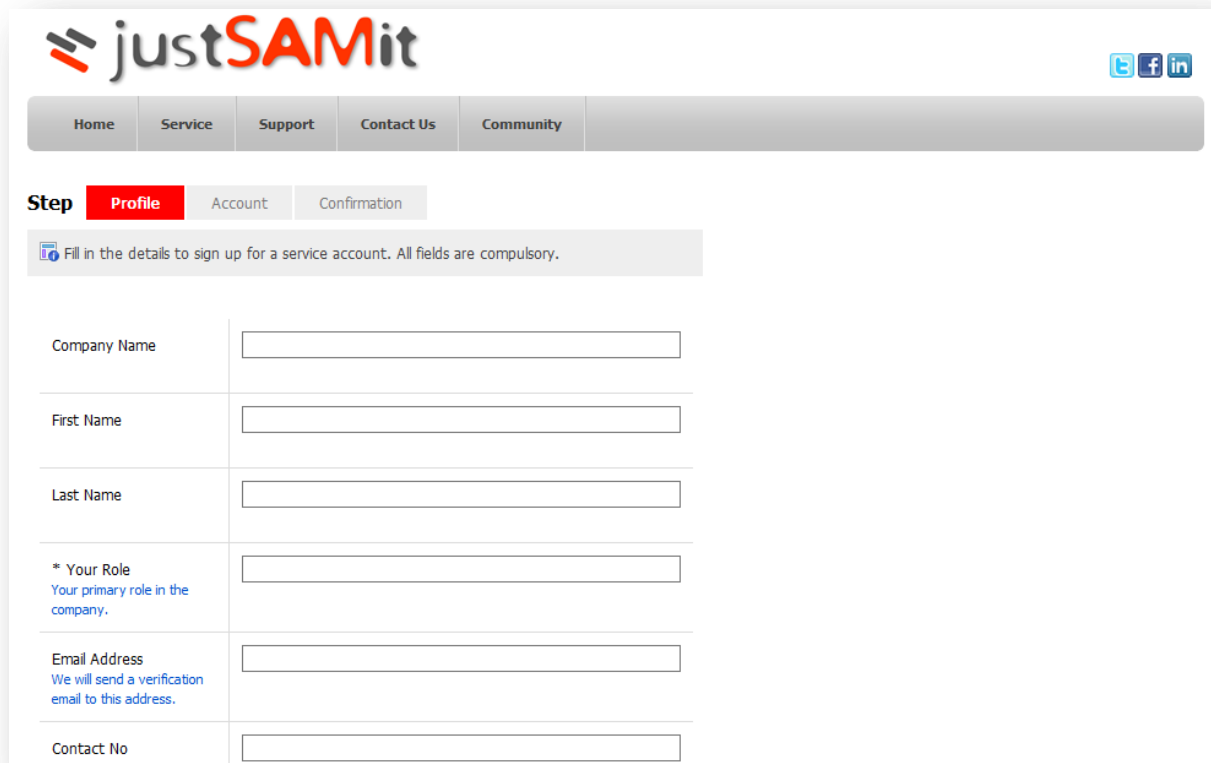

Just login to your website at www.justsamit.com and begin managing your assets.

Setup and Activate your Account

Sign Up

Visit www.justsamt.com and sign up for an account. Just fill in your particulars and submit the details.

The screenshot shows the justSAMit website's sign-up interface. At the top, there is the justSAMit logo and social media icons for Twitter, Facebook, and LinkedIn. Below the logo is a navigation menu with links for Home, Service, Support, Contact Us, and Community. The main content area is titled "Step" and has three tabs: "Profile" (which is highlighted in red), "Account", and "Confirmation". Below the tabs is a grey box with a blue icon and the text: "Fill in the details to sign up for a service account. All fields are compulsory." The form consists of several input fields arranged in a table-like structure:

Company Name	<input type="text"/>
First Name	<input type="text"/>
Last Name	<input type="text"/>
* Your Role <small>Your primary role in the company.</small>	<input type="text"/>
Email Address <small>We will send a verification email to this address.</small>	<input type="text"/>
Contact No	<input type="text"/>

Activate your new account

You will receive a Service Validation email for account activation. Here is a sample of the Validation email:

Welcome Christopher Lee!

We have received your request to register justSAMit service account for **RF Consultant** on Sunday, 10 October, 2010.

Here is your account information:

Company Name: RF Consultant
Email: chris@rfconsultant.com
Registered By: Christopher Lee

Activation
Link

Please click the link below to activate:

<http://www.iustsamit.com/ValidateAccount.aspx?oid=Nzq1OWJiMmThmMWItMzJiYTBhN2NIYWZh>

Let's get started..

Step 1: Setup and Activate your account

You have successfully created an account with us. Please click [here](#) to activate it.

Step 2: Deploy to your computers

Multiple operating system platforms such as Windows, MacOS, Linux and Unix are supported. You can download the agent from justSAMit

Step 3: Start Your Inventory!

Just login to your [website](#) and begin managing your assets.

Activation
Link

Click on the [activation link](#) in **Step 1** or the link provided in the email. You will be taken to a Thank You page and at the same time, you will receive a Summary email to inform you that you have successfully created a justSAMit cloud service account. However, if you do not receive the Service Validation email, please check your Junk E-mail folder to make sure it has not been mistaken for spam. To ensure that you receive all messages from justSAMit in the future, add support@justsamit.com as a "safe sender" in your email software. Here is a sample of the Summary email:

Welcome to justSAMit

Thank you for your activation. You have successfully created justSAMit cloud service account for **RF Consultant** on Wednesday, 10 October, 2010. Here is your login information:

Login Name: chris@rfconsultant.com

Company Name: RF Consultant

3 Simple Steps to Manage your IT Assets

Step 1: Setup and Activate your account

You have completed this step. Let's move on to Step 2

Step 2: Deploy to your computers

Multiple operating system platforms such as Windows, MacOS, Linux and Unix are supported. You can download the agent by logging into justSAMit Administration [website](#)

Download the Agent

To manage your desktops, laptops or servers, just download and install (with Local Administrator rights) the correct agent based on the computer's Operating System. justSAMit uses a small footprint agent that does not require user's configuration or intervention. It will periodically collect and report the computer's inventory to justSAMit servers based on the settings configured by the company Administrator.

The default agent settings are:

Access Method	Scan machine	Submit inventory data	Submit life pulse
Directly to cloud	Every 240 minutes	Every 245 minutes	Every 60 minutes
GeoLocation	Disabled		

To download the agent, please navigate to the "Agent" Tab and download the agent according to the type of Operating System. After the agent is installed on your computers, please allow several minutes for the new inventory to appear on your web dashboard.

Agent Deployment methods

After the agent is downloaded, you can deploy the agent across your organization with the following methods:

1. Direct Installation

Log in to the computer using a Local Administrator or Domain Admin account, download/copy the agent package and install the agent.

2. Active Directory GPO

You can copy the setup file to a shared network folder or AD Distribution Point and configure the group policy on your Active Directory Domain or OU (see: <https://learn.microsoft.com/en-US/troubleshoot/windows-server/group-policy/use-group-policy-to-install-software> Note: the document is still applicable for Windows Server 2019 and 2022)

3. Using Software Distribution tools

You can use other software distribution tools (e.g. Microsoft SMS) to deploy the agent throughout your organization.

Self Service Inventory

If your users have local administration rights and can install software, you can email them a download link to download and install the agent. To do that go to Administration, Download Agent and click on “Enable self service download”. After a few minutes, refresh the page and you should see a self-service URL. You can then email this link to your users. Please refer to the Cloud Administration document for further details.

> [Administration](#) > [Download Agent](#)

Download agent

Platform	Download
Windows	
Mac	
Centos/Redhat	
Solaris 10 x86	Coming soon
AIX	Coming soon

Start your Inventory

Login to justSAMit

Log in using your email address at <https://www.justsamit.com>. You will be able to view your collected inventory and manage your IT assets now!

The screenshot displays the justSAMit web application interface. At the top, there is a navigation menu with options: Overview, Inventory Reports, Other Assets, License Management, Administration, Cloud Administration, and Configuration. The user is logged in as Janet Ang, with a 'Sign Out' button and a license notice for 'YP Test Company 1'. The main content area is titled 'Inventory Summary' and shows the following data:

- Total no of audited machine(s): 1
- Total no of audited software: 212
- No. of machine(s) updated in the past 14 days: 1
- Most recent update time: 12/10/2010 12:38:26 AM
- No. of new machine(s) discovered today: 1

Below the summary, there is a section for 'Statistics OS' showing '1 operating systems found'. A bar chart displays 'Microsoft Windows 7 Enterprise' with a count of 1. The interface also includes a 'New today' section with a notification for 'ALCHEMIST' and 'Since yesterday' and 'Older than yesterday for past 60 days' sections, both showing 'No changes'.

And Much More...

justSAMit offers you detailed and up-to-date hardware inventory information and functionalities as well as customizable reports to help you track and manage your PCs and servers throughout their hardware lifecycle. We let you be on top of your asset inventory, not just hardware and software, but other assets as well. Start using justSAMit functionalities such as License Management, Query Wizards, Patch monitoring and reporting.
